1991

UMI

WORLD PATE

Aims and Scope

The aim of *World Patent Information* is to provide a worldwide forun patent information and documentation field and to promote the

Regular features include:

- New regulations pertinent to patent information and documen
- Advance notices and short reports on meetings and conferenc
- Bibliographies and book reviews.

Notes for Contributors

General

The Editor-in-Chief will be pleased to receive contributions from parts of the world and manuscripts for publication should submitted to him. Contributions may also be communicated v members of the Editorial Advisory Board.

Only papers not previously published will be accepted, and autho must agree not to publish elsewhere a paper submitted to an accepted by the Journal.

Manuscript Requirements

Manuscripts should be typed double spaced on one side of the pag only with wide margins. While no maximum length of contributions i prescribed, authors are encouraged to write concisely.

The title should be brief. The author's name should be typed on the line below the title with affiliation and address below. In the case of co-authors, respective addresses should be clearly indicated, as well as which author is to receive correspondence and proofs for correction. The body of the manuscript should be preceded by a summary.

Illustrations and tables should accompany the script but should not be inserted in the text. All photographs, charts and diagrams must be referred to as 'figures' and should be numbered consecutively in the order in which they occur in the paper. Line drawings should include all relevant details and should be drawn in black ink on plain white drawing paper or tracing cloth. Good photoprints are acceptable, but blueprints or dye-line prints cannot be used. Drawings, etc. should be about twice the final size required and lettering must be clear and 'open', and sufficiently large to permit the necessary reduction of size for publication. The following standard symbols should be used on line drawings since they are easily available to the printers: ○, ●, +, ×, ■, □, △, ▲, ◇, ◆, ▽, ▼. Photographs should be sent as glossy prints. If words or numbers are to appear on a photograph two prints should be sent, the lettering being clearly indicated on one print only.

References to published literature should be quoted in the text in

Printed in Great Brita
